

Volvo Group welcomes the report and the recommendations made by Swedwatch. We would also welcome a broader collaboration and dialogue to address the non-standard employment as described in the report. As the only company participating in the report we would have appreciated a broader case study with more companies to be able to have a fruitful multi-stakeholder dialogue.

We would like to emphasize that Volvo Group follow all applicable laws and legislations, as well as our own decided Code of Conduct and we believe in working with various processes to identify risks and to secure good and decent working conditions for our employees.

We would like to add that we have engaged and committed employees in India that not only do a good job but also are contributing to the development of our business and the local community.

As a next step we will discuss the report with the ambition to further improve in our operations in India.
